

PEDAL PAD KIT

Softer on your feet! Neoprene pads are self adhesive and stick right to your pedals. Stock on Drives built in 2010+
 72020034 PEDAL PAD KIT BLACK (PAIR)

DRIVE WELL SEAL

Keeps the seat area drier. Seals the aft end of the MirageDrive well. Limits the incursion of water into the cockpit caused by the surge action of the drive fins. Testers also claim some improvement of forward thrust. Easily attaches to older MirageDrive spines (pre-2013). Kit includes one seal and two attachment "zip ties".

MIRAGEDRIVE STOW BAG

Protect your MirageDrive... and other goods in your car from the drive! This heavy duty Cordura and mesh bag fits the complete MirageDrive with standard fins or the ST Turbo length. It has small pockets inside for the speedo tube, scupper plugs or spare parts. Has a carry handle and a shoulder carry strap. There is extra space in the bag for things like a life vest or drive well plug. Also includes "D" ring fittings to allow attachment to Inflatable rolling bags. Large enough to store your Inflatable's drive, pump and 4 piece paddle.

Now you can make your Hobie MirageDrive a SUPER PERFORMER!

PERFORMANCE FINS - ST OR ST TURBO!

The Hobie MirageDrive is the most amazing propulsion system ever seen! But there is more!

Increase your performance or increase your fitness routine, you choose the fin that is right for you: Standard, ST or ST Turbo... low, medium or a higher gear! The standard fins, supplied with our kayaks prior to 2015, are the easiest pedaling fins, but some users feel that the standard fins do not offer enough resistance. ST became standard equipment in 2015 models. This is very evident when using a sailing kit. The added power and speed of the sail often outpaces the standard or even ST fins (similar to pedaling a bike down hill in first gear).

Want to go really fast? Add ST TURBOS. Hobie Mirage kayak users report as much as 10% increase in speed and more using ST TURBO Fins. But its not all about speed, you can get top end speed and a slower cadence for cruising (Less pedals per mile). All achieved with these larger and more efficient fin designs. These longer fins can also increase lateral resistance for sailing upwind.

The ST (Square Tip) designs will require a bit more effort to pedal. The added effort is commonly compared to pedaling a bike up a slight incline. In addition, the included fin tension screw allows adjustment to achieve lower end torque or top end speed to meet the desires of the pedaler.
